Regulation of Medical Robots in Switzerland

The Example of Robotic Applications in Minimally Invasive Surgery

Joel Drittenbass M.A. (HSG) in Law, Institute of Public Finance, Fiscal Law and Law and Economics at the University of St. Gallen

Isabelle Wildhaber Prof. Dr. iur., LL.M., Attorney at Law, Director of the Institute for Work and Employment Research at the University of St. Gallen

Keywords: Data Protection Law, Medical Device Law

Abstract: *The use of robotic applications is a growing trend in Switzerland's healthcare sector. For example, robots have been broadly in use in minimally invasive surgery. Robotic applications in minimally invasive surgery are an information-driven and safety-critical technology governed, amongst others, by data protection as well as medical device regulations...*
