Unlocking the Potential of Scientific Data-Driven Research

A Pragmatic Proposal to Enable Research While Preserving Privacy and Inspiring Trust

Alea Garbagnati Compliance Counsel, Roche Molecular Solutions, Pleasanton

Dorien Van Doninck Global Privacy Counsel, F. Hoffmann La-Roche Ltd, Basel

Barbara Schroeder de Castro Lopes* Group Legal Counsel, F. Hoffmann La-Roche Ltd, Basel

Keywords: Data Protection Law, Human Research Law

Abstract: *The use of data in biomedical science and research has become important, particularly in light of recent health crises. While privacy laws were supposed to help enable research within its framework, this has been difficult in practice. The authors propose pragmatic avenues to managing clinical studies and scientific research that are privacy-preserving...*
