Enhanced Privacy for Data Analytics

How Confidential Computing Can Enhance Data Protection Compliance for Data Analytics

Matthias Eigenmann* MLaw, Attorney, own.legal, Zurich

Keywords: Privacy, Data Protection, Data Security, Privacy-by-Design, Data Analytics, Privacy-enhancing Computation, Confidential Computing, Trusted Execution Environments

Abstract: *Data requires analysis to tap into its value. Processing of personal data, including analysis, is subject to increasingly demanding legal requirements. The trend towards externalization and an evolving cyberthreat landscape are...*
