Bringing CAR-T to Reality

Selected Legal and Regulatory Considerations

Marieke Jansen^{*}LLM, Legal Head Cell and Gene Therapies Europe, Novartis Pharma AG, Basel

Keyword: Medicinal Products Law

Abstract: *This article provides insights about the unique set-up for CAR-T therapies with regard to scientific and medical characteristics, but also manufacturing, delivery, access and commercialization. However, the regulatory and legal challenges that come along with such cutting-edge technologies are significant. They mirror the frequently encountered problem that the respective...*
